# Research Opportunity for Adults with Fabry

I am researching what information Fabry patients would like to have before undergoing genetic testing. The information gathered from this research will be used to create an educational video about Fabry disease to be utilized by patients undergoing remote genetic testing.

## Who Can Participate?

Any English-speaking individual 18 years or older with Fabry disease.

## What Happens in the Study?

People interested in the study will complete an online questionnaire. The questionnaire should take about 15 minutes. Participants will have the opportunity to enter a raffle to win one of four \$25 Amazon gift cards before starting the survey. Participants do not have to complete the survey to be entered into the raffle.

People interested in participating in more research will have the option to enter their contact information to be contacted for an interview. This interview can be done over the phone or in person, if applicable. The interview should take about 45 minutes. People who are interviewed will receive a \$10 gift card.

**If you'd like to participate, please follow the link below:**
